

Amendments to the Specification:

Please replace the Summary of the Invention at page 2, lines 6-13, with the following rewritten paragraph:

--A rotary fluid pressure device has a first oil passage with relatively high pressure fluid therein surrounding the gear set; a plurality of second oil passageways connecting the first oil passageway to the expanding and contracting oil chambers; and fluid non-return valves in each of the second oil passageways to permit the flow of oil therethrough only in a direction ~~from~~ to the oil chambers ~~to~~ from the first oil passageway.--

Please add a new paragraph at page 4, after line 19, as follows:

--Each volume chamber 26 and 28 of the gear set 14 is connected through a passage 38 with valving 40. The valving 40 cooperates with the housing 12 to provide fluid communication between the ports A and B and the volume chambers 26 and 28.--

Please replace the Abstract at page 9, lines 6-13, with the following amended paragraph:

ABSTRACT

--A rotary fluid pressure device has a first oil passage with relatively high pressure fluid therein surrounding the gear set; a plurality of second oil passageways connecting the first oil passageway to the expanding and contracting oil chambers; and fluid non-return valves in each of the second oil passageways to permit the flow of oil therethrough only in a direction ~~from~~ to the oil chambers ~~to~~ from the first oil passageway to the oil chambers.--
